

MINI PROJECT

THE OPEN UNIVERSITY OF SRI LANKA
BACHELOR OF SOFTWARE ENGINEERING
ACADEMIC YEAR – 2021/22
EEI3346 -WEB APPLICATIONS DEVELOPMENT

PEARL OF INDIAN OCEAN

NAME: V. SHRIWARTHAN

STUDENT ID: S92069236

EMAIL ID: s92069236@ousl.lk

PROBLEMS & SOLUTION

- This was my first web development project. It's very challenging and interesting, like a thrilling video game. From this project onwards, I started my self-learning. I gained massive knowledge and experience. But in some stages, I deliberately faced many struggles.

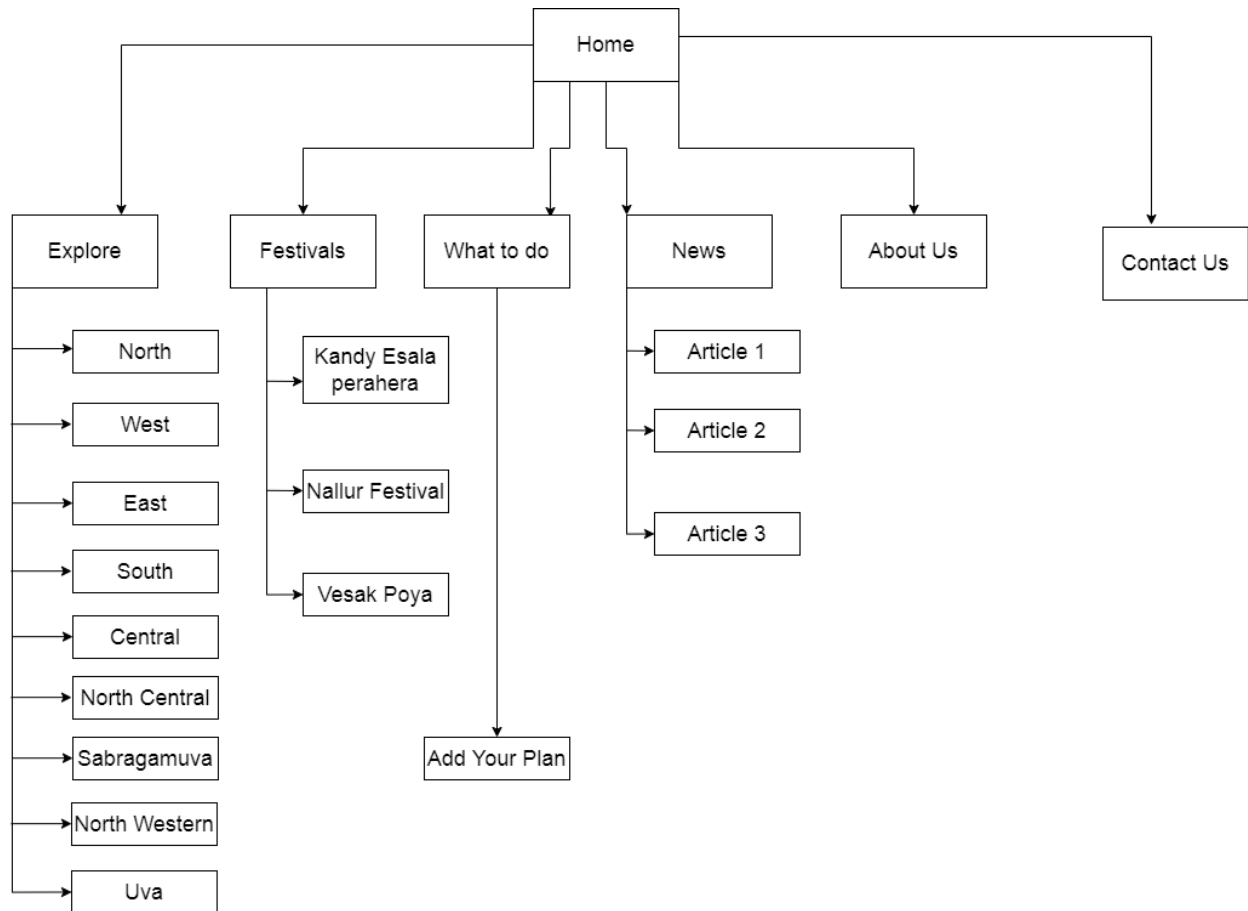

The initial problem was with Vue.Js.

- This is the first time I heard about Vue.Js. I didn't get enough knowledge about Frameworks. At one stage, I neglected to do Vue.Js.

How had I solved it?

- The university organized a workshop on Vue.Js.
 - It's a 2-hour workshop, but I got a lot of knowledge about Vue.Js.
 - I repeatedly watched the recordings.
 - I learned Vue.js within two weeks.
-
- Sometimes I had time issues, so I planned a schedule that we learned in the EFIL Course
 - Luckily, while doing this project, we had to take the CAT Exam. OUSL kindly offered us an extra few days to complete it.
